LET'S GET PREDICTIVE

ALGORITHMIC SPORTS TRADING

We aim to deliver top-notch tools and entertainment to our customers who attend spectator events in arenas or stadiums. Our company has developed high-quality hardware, the Smart Ball, along with an intelligent portfolio solution app. This app validates players' and teams' skills through data streams from our Smart Ball, enabling fans to engage in sports trading using machine learning and artificial intelligence. Spectators can place bets based on verified game analytics from our Tech Ball game stats, utilizing real-time data predictions to potentially earn substantial profits with insights from teams and players. NIBLS leverages the collected stats through our exchange marketplace at live spectator events, employing sports trading strategies such as scalping, arbitrage, and hedging. Enhance your sports predictions with real-time biometrics. The Tech+Ball product can revolutionize club recruitment by utilizing web3 for players' career path training, offering users a learn-to-earn experience before transitioning to a professional club. Players and teams can enhance in-game decision-making during practices, tournaments, seasons, and playoffs, while also improving betting strategies and probabilities. The Tech+Ball sports challenge determines wins and losses based on data from seasons and playoffs. Furthermore, this innovation can assist American football, European Rugby, and European team and beach handball clubs in recruitment and training endeavors.

STARTUP VISION AND MISSION

Vision

The aim is to create opportunities for public and private learning, engagement, and competition in our sports genre from middle school, high school, collegiate, to the professional levels. We will focus on:

- Teamwork, sportsmanship, and competition
- Mastering strategies and essential skills
- Competing with clubs and teams from other organizations
- Fostering friendships and promoting civic awareness

Additionally, we will invest in reducing the professional sports job gap for minorities and minimizing the cancellation of professional athletes.

Mission

Establish reciprocal clubs at 72 colleges and universities, including women's clubs. Historically, we aim to recruit athletes for our professional sports genre on a global scale.

PROBLEM

ISSUE OVERVIEW

<https://www.latimes.com/sports/story/2023-01-29/sports-diplomacy-state-department>

Gatekeepers to Opportunities

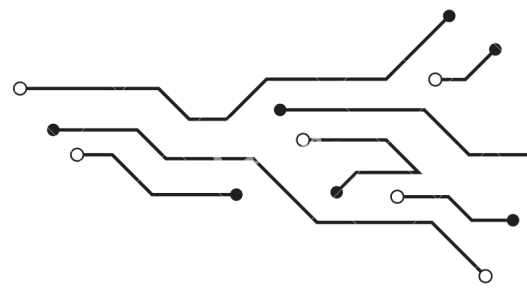

Black students less likely to attain college degrees because of discrimination and external responsibilities, study finds

Will Minorities Rise to Top Positions in the Business of Sports?

Challenges Faced by Countries That Create Difficult Situations for Children, Young Adults, Men, and Women.

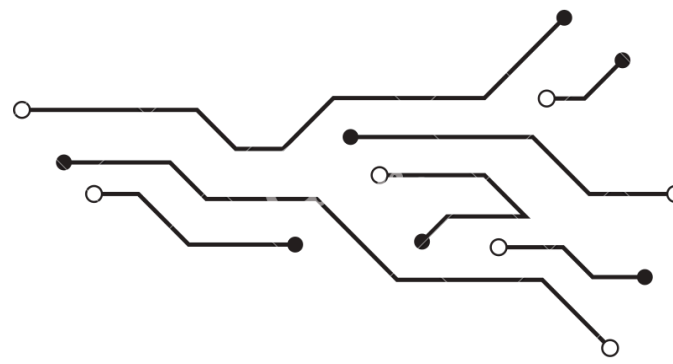

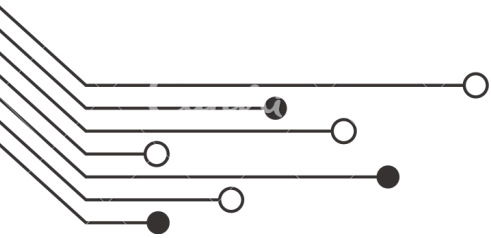

PROBLEM SUMMARY

Acquiring a degree is crucial for employment, but many face challenges like dropping out, low performance, or balancing college sports, especially in underserved communities. Educating children to overcome social issues is complex, particularly amid social unrest. Technology and sports can make a positive impact, but ethical standards and skill development are vital for personal fulfillment. Adverse factors like family discord, violence, and economic instability create cycles of hardship that affect future generations. It's important to distinguish between bullying and ethical behavior to build resilience and counter negative influences. Talented students often lack support despite their qualifications. Collaborative efforts in hiring and sports diplomacy can promote financial inclusivity and encourage those facing educational barriers to pursue professional pathways, ultimately benefiting underserved communities.

Educating children to overcome social disorganization is complex and crucial in today's climate of unrest. Integrating technology and sports can positively impact lives, while ethical standards and skill development promote personal fulfillment. Adverse factors like family issues and economic instability perpetuate cycles of poverty and unhealthy habits, affecting mental health and social behavior. Differentiating bullying from ethical conduct and countering harmful marketing strategies are essential for resilience. Collaborative support and inclusive hiring practices in sports can help individuals facing obstacles in education transition to professional pathways, potentially uplifting underserved communities.

Excluding children and ethical individuals from the workforce hinders national progress and poverty reduction. Their absence results in lost contributions to innovation, economic growth, and social improvement, perpetuating poverty and stifling creativity. Embracing diverse talents and ethical perspectives is essential for fostering an inclusive economy that can adapt to global challenges.

PROBLEM

OTHER PROBLEMS IN SPORT'S PROBLEM SUMMARY

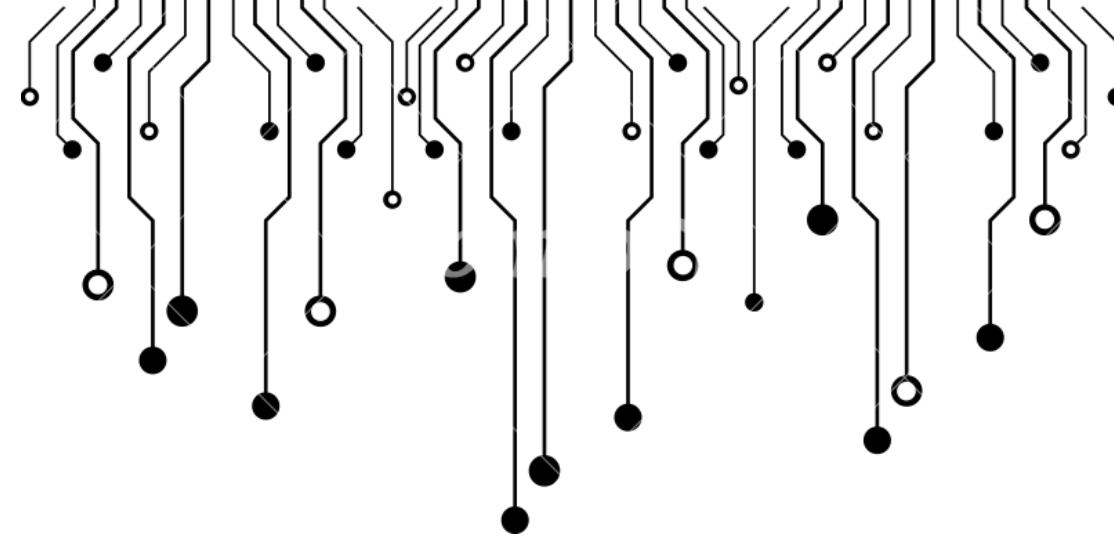

Identifying new talent is essential for the strategic planning of a sports club's future. For example, elite European clubs actively recruit highly skilled players who can enhance both the team's immediate and long-term success. In contrast, lower-division clubs may sign players with the goal of developing and selling them for profit, ensuring the club's sustainability. Most clubs rely on a network of scouts, which can include former players, journalists, or dedicated fans, to uncover promising talent. The extent of scouting usually depends on the club's budget and may focus on specific geographic areas and divisions.

The scouting landscape is fiercely competitive, with all clubs participating, and the one that identifies talent first often secures the best hiring opportunities. However, traditional scouting faces hurdles such as high costs, limited global reach, and the potential to miss out on outstanding talent. Scout reports can be subjective, often based on just a handful of game observations, and may not provide a comprehensive assessment of a player's abilities and potential for growth.

Additionally, while coaches, managers, and scouts usually focus on a player's physical and tactical skills, a thorough evaluation also involves understanding their personality, temperament, and mindset. This insight is invaluable to clubs, as players are not only assets to the team but also play a significant role in marketing.

CASE STUDY

SOLUTIONS

Our plan to dealing with a difficult situation and solving the countries problems.

PROJECT OVERVIEW

Tech+Ball has developed an elite accelerator and reward system for public interest, military, and collegiate athletes aspiring to go pro. Fans can engage by attending live sports events for entertainment or profit. The product features unique fingerprint biometric technology to identify top athletes and includes a web3 learn-to-earn training program, preparing them to become future superstars.

NIBLS biometric Hardware can be used with blockchain Web3 (play-to-earn purpose) and other sports genres like team handball, football, rugby.

EXECUTIVE SUMMARY

The NIBLS Scale provides analytic data through an API for real-time statistics on teams and athletes. It tracks specific skills as rewards on an exchange, reflecting fractional increases, full increases, or decreases in value based on metrics like ball steals, interceptions, passes, catches, scores, and throwing distances, power, and speeds.

Tech+Ball is a 7 Vs. 7 ball game, the goal is to outscore and win based on data analytic traction in realtime.

EXCLUSIVE OFFERS

- Access to professionals based on players' real-time performance in exhibitions, practices, and tournaments.
 - Free exclusive rewards and perks from a player store, including opportunities to earn money through cash-ins, sponsors, endorsements, and crypto.
 - VIP membership perks and upgrades.

TECH+BALL GENRE RULES

Game Play and Rules

01 GoalKeeper

Protecting the goal line and goal area from offensive attackers. Strength in ball strips, strong power blocking and tackling.

02 Left Wing Defender

Protecting the left wing of the field, collecting ball drops or picking up turnovers, blocking, tackles and making interceptions.

03 Right Wing Defender

Protecting the right wing of the field, collecting ball drops or picking up turnovers, blocking, tackling and making interceptions.

07 Offensive Pivot

create space in tight situations, all around the field vision, game ball performance traction developer, power passing and scoring.

04 Central left field tackle

Stopping the center left field from gaining traction and creating space. Collecting ball drops or locking up the center left field for turnovers, blocking, tackling and interceptions.

05 Central right field tackle

Stopping the center right field from gaining traction and creating space. Collecting ball drops or locking up the center right field for turnovers, blocking, tackling and interceptions.

06 Offensive Runner

Create game ball performance traction developer, strong athletic running skills, strength is protecting the ball, running long distances, passing and power scoring and play actions.

HOW TO PROFIT

How to Generate Income

Whitepaper Report

NIBLS Coin - A Case Study in Sports Trading:

- Purchase Options (Laying) when the odds are low and then sell when the price rises.
(This means betting on a team to lose rather than win).
- Acquire Offers (Backing) and sell when the odds are significantly high.
(This indicates betting on a team to win instead of losing).
- Buy Drawbacks to exit the bet.
(This shows that you are no longer part of the betting pool, thus avoiding a loss or win).

NIBLS Sports Trading

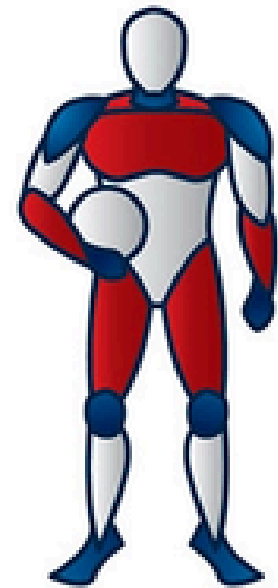

Picture yourself watching the Eagles compete against the AR-15z with a friend, and you both decide to place a wager using the NIBLS Coin app. Your friend is convinced that AR-15z will win, while you believe in the Eagles' success.

- **You examine the odds, which indicate that AR-15z is likely to lose based on statistical analysis.**
- **You agree to place a joint bet of £30.00 on the probabilities, distributing the £30.00 across the following odds:**
 - £5.00 - Speed averages
 - £5.00 - Power averages
 - £5.00 - Total completed catches (AR-15z has 45 completed catches)
 - £5.00 - Total pass completions in the first 2 minutes of the first quarter
 - £5.00 - Average distance
 - *£5.00 - Winning or Losing Scores (high or low scores)*
